

# UVGEL WALLPAPER FACTORY

## Digital done right

A fully modular solution for mass-customised automated wallpaper production with UVgel technology at the core

## Take customised wall décor production to the next level

Designed for maximum throughput, high quality and to run all day long, the UVgel Wallpaper Factory is a fully automated and modular production facility for digitally printed wallpaper: from the bulk-sized media input straight through to the finished rolled output.

## Fully modular solution, open interface

Are you looking to extend your business to the next level? Whatever your situation, we have the solution, inline or nearline. The Colorado open interface enables the UVgel Wallpaper Factory to be integrated into existing workflows, giving the option to choose input and output solutions from your preferred supplier.

### 1. Jumbo Roll JRL 170

A motorised Fotoba Jumbo Roll JRL 170 media feeder.

### 2. Colorado 1650

The Colorado 1650 Large Format roll-to-roll printer with UVgel technology.

### 3. Cutter XLD 170WP

A Fotoba Cutter XLD 170WP, cutting the output to the desired specifications in both the X and Y direction.

### 4. Rewinder REW 162

A Fotoba Rewinder REW 162 with embedded taping unit to rewind the printed and cut wallpaper, ready for immediate delivery and application.

## UVgel at the heart: perfect for wallpaper printing

UVgel technology, which is at the core of our Colorado roll-to-roll printers, is a perfect fit for printing wallpaper, among other applications. It delivers the productivity, quality, speed, and versatility which today's wallcoverings market demands.

Have you been looking to switch from analogue to digital for some time but haven't found the right tool to get started yet? Or are you looking to take your business to the next level? Look no further!
